DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 20-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hermeyer et al. (GB 20030140A) in view of Tompkins et al. (US 5361215).

Regarding claims 20-21, Hermeyer teaches an image sensing system comprising:

sensor units (1, 2, 3) adapted for converting a radiation ray into an electrical signal;

selection means (14, 15, 16) for indicating a state of said sensor units; and
a control unit (20) that controls said sensor units to be in a ready state (selected by switch 20) or a sleep state (unselected by switch 20).

However Hermeyer fails to teach that the selection means are blinking lamps.

Tompkins teaches a control panel having blinking button (column 7 line 60-64).

It would have been obvious to one of ordinary skill in the art at the time of the invention to modify the selection means of Hermeyer with the Blinking button as taught by Tompkins, since the blinking button of Tompkins would provide easier and better visual indicating state of the selection means.

Allowable Subject Matter

Claims 13-19 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

The prior art fails to teach an image sensing system having lamps for indicating a state of a plurality of sensor units and a control unit sending a command to un-selected sensor unit to be in sleep state as claimed in independent claims 13 and 18.

Response to Arguments

Applicant's arguments with respect to claims 13-19 have been considered and rejection under the judicially created doctrine of obviousness-type double patenting has been withdrawn and the newly presented claims 20-21 also have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
